MINI-BALL DZR

WATER BALL VALVES

- M/F mini-ball - DZR with lever
- Thread: ISO 228
- Nominal pressure: max 10 bar
- Temperature range: -10°C to $+90^{\circ}\text{C}$

This valve is particularly indicated for distributing and shutting off fluids that can cause dezincification problems.

Excellent fields of application are in plant engineering for plumbing, heating, pneumatic and industry, when it is necessary to have a shut-off element with reduced dimensions.

It is a reduced-bore valve, and ball seal is provided by two PTFE seats.

Seal of the stem is provided by an NBR O-ring with the stem mounted from inside and a bottom-loaded system.

It is advisable to perform a complete manoeuvring cycle at least once every 3 months to prevent the formation of limescale, which would affect operation.
